

**15-06-2014**

The aim of the project is to support the community of Palompon by rehabilitating damaged school of Palompon National High School located at Brgy Central 2, Palompon Leyte. To be part of a prestigious project that will bring the school back to a conducive place to study again. The school has a present population of 700 students.

Most of the school buildings/classrooms lost the complete roof panels, windows and frames, furniture (computers, tables and chairs), school materials and books. The building structures for some are still intact but some are totally blown away.

At the time I visited the High school during my visit at Palompon they already started rebuilding the classrooms! From that week (first of June) It should take another 45 days to complete rebuilding the classrooms right in time before the new school year starts.
